MIND & MAPS

"Step into Mind & Maps, a SPACE initiative that blends creativity with conversation.
Through art that reflects thoughts, emotions, and lived experiences, we explore how expression becomes healing. From colors on canvas to ideas on paper, this event celebrates the powerful link between creativity and mental well-being.

Alongside engaging art activities, we'll host meaningful mental health talks to spark awareness, reflection, and open dialogue.

Because sometimes, the best way to understand the mind... is to create from it. "
